## SDS/2 Estimodeling Featured as Modern Steel Construction 2020 Hot Product

[Industry Insights](#)/ August 06, 2020

You may know how powerful SDS/2's intelligent connection design is for steel detailers, but SDS/2 Detailing isn't the only software solution we have on the market that's paving the way for automation, accuracy, and efficiency in the industry.

In this month's issue of [Modern Steel Construction](#), you'll see [SDS/2 Estimodeling](#), another one of our great software solutions, featured as a 2020 Hot Product.

## **What Makes SDS/2 Estimodeling 'Hot'**

SDS/2 Estimodeling is the only structural steel estimating software on the market today with built-in connection optimization. Powered by the intelligence of our all-in-one 3D steel detailing with automated connection design, it allows you to generate fast and accurate model-based estimates without relying on tables or third-party software.

### **[SCHEDULE A DEMO WITH SDS/2 ESTIMODELING TODAY>>](#)**

But 'fast and accurate' is only the beginning. If you take advantage of all the software has to offer, you can gain a true competitive advantage.

### **Here are a few examples of powerful ways you can use SDS/2 Estimodeling:**

- Tailor estimates to your shop standards
- Identify expensive fabrication conditions
- Quickly compare alternative designs for cost-optimized fabrication
- Spot check model costs
- Pre-identify RFIs
- Import design models
- Get a jumpstart on project detailing
- Use the 3D model as a sales presentation tool to help win projects

SDS/2 customer Drake Williams Steel has been transitioning to an SDS/2 Estimodeling workflow and is already seeing the benefits in providing their customers more complete pictures of the budget and tonnage of a project and getting more bids out the door.

“It saves us 30 – 40 percent on time when we use the model and create material lists,” said Derrick Fitton, Director of Operations for Drake Williams Steel – Structural Division.

See for yourself how SDS/2 Estimodeling can transform your bidding process and win you more projects. [Schedule a demo with SDS/2 today >>](#)

Online training and certification is now available for SDS/2 Estimodeling. The course covers all the skills, tools, and workflows involved in model-based estimating with SDS/2. Learn basic modeling concepts, connection setup and automation, and more, all at your own pace. [Start learning today >>](#)

## About the Nemetschek Group

The Nemetschek Group is a globally leading software provider for digital transformation in the AEC/O and media industries. Its intelligent software solutions cover the entire lifecycle of building and infrastructure projects and enable creatives to optimize their workflows. Customers can design, build, and manage buildings and infrastructures more efficiently and sustainably and develop digital content such as visualizations, films and computer games more creatively. The software provider is driving innovations such as digital twins as well as open standards (OPEN BIM), and sustainability in the AEC/O industry, constantly expanding its portfolio by also investing in deep-tech startups. Currently more than seven million users worldwide are shaping the world with the customer-focused solutions of our four divisions. Founded by Prof. Georg Nemetschek in 1963, the Nemetschek Group today employs around 3,600 experts globally.

Publicly listed since 1999 and quoted on the MDAX and TecDAX, the company achieved a revenue of EUR 851.6 million and an EBITDA of EUR 257.7 million in 2023 according to preliminary figures.
