Spacewell Germany releases iX-Haus annual release 20.20

Spacewell Germany has published the annual release iX-Haus 20.20. With the latest iX-Haus version, users will receive numerous new program features and comfort improvements that will further automate, simplify and improve their daily work. Especially the scheduler, i.e. the automatic execution of regular processes, and the reporting package are to be highlighted.

In the annual release, numerous customer requests were also implemented - from smaller features to more extensive modules, such as parcel management. In addition, important performance-optimizing adjustments were also made. Most extensions are available in the standard update. In

addition to the "Scheduler", the "Reporting Package" and the "Land Parcel Management", the new license modules also include the "Census Premium" module, which allows users to easily implement the requirements of the 2021 census.

The topic of quality assurance is particularly important to Spacewell Germany - in addition to manual tests, more than 800 automated test cases now ensure this quality standard.

"We are very happy that we were able to complete the new version iX-Haus 20.20 with these extensive enhancements on schedule despite the circumstances we faced during the Corona crisis. With the adaptations, extensions and license modules we are once again optimizing our software considerably and further expanding the range of functions.

A big thank you to our development team, who always put their heart and soul into the implementation", says Holger Leibling, authorized signatory and head of product management at Spacewell Germany.

About the Nemetschek Group

The Nemetschek Group is a globally leading software provider for the digital transformation in the AEC/O and media industries. Its intelligent software solutions cover the entire lifecycle of construction and infrastructure projects and allow creatives to optimize their workflows. Customers can plan, construct, and manage construction projects more efficiently and sustainably, and develop digital content such as visualizations, films, and computer games in a creative way. The software company drives new technologies such as artificial intelligence, digital twins, and open standards (OPEN BIM) in the AEC/O industries to increase productivity and sustainability and continuously expands its portfolio, including through acquisitions and investments in innovative start-ups. More than 7 million users are currently using the customer-focused solutions. Founded by Prof. Georg Nemetschek in 1963, the Nemetschek Group today employs more around 4,000 experts.

The company, which has been listed in the MDAX and TecDAX since 1999, achieved a revenue of EUR 995.6 million and an EBITDA of EUR 301.0 million in 2024. Since the end of 2024, the Nemetschek Group is certified in

accordance with ISO 27001, the internationally recognized standard for information security management systems (ISMS).
