## AI and Sustainability: Nemetschek Group Presents Latest Technologies at BAU 2025

Munich, Germany, December 10, 2024 – The [Nemetschek Group](#), one of the world's leading providers of software solutions for the construction and real estate industry, is presenting its combined innovative strength at [BAU 2025](#) in Munich. From January 13 to 17, 2025, the Group will be presenting pioneering technologies for the digital transformation of the construction industry at a joint stand (Hall C3, Stand 322). The focus will be on **artificial intelligence (AI)** and **sustainability**.

The Nemetschek Group will use BAU 2025 to show how innovative

technologies are transforming the entire building life cycle – from design and construction to the management and use of buildings. The joint stand offers visitors the opportunity to experience the Group's software solutions live. Presentations, live demos and discussion panels will highlight the role of AI and cloud technologies in increasing efficiency and reducing resource consumption in construction projects.

### **Innovation at BAU 2025: A strong presence with leading brands**

At the Nemetschek Group stand, the brands **Allplan, Bluebeam, Crem Solutions, dRofus, Graphisoft, Nevaris, Solibri and Vectorworks** will be presenting their latest software solutions. With the **dTwin** platform, the Nemetschek Group shows how digital twins can contribute to more efficient and sustainable construction.

By focusing on open, compatible and scalable technologies, they demonstrate how the construction industry can position itself for the future through improved collaboration, optimized workflows and innovative approaches. In addition to numerous demos, start-ups in which the Nemetschek Group acts as an investor will also present their innovations.

"BAU 2025 is our canvas to paint a bold vision of the future – a future where sustainability and digital connectivity are the cornerstones of the construction industry," says Yves Padrines, CEO of the Nemetschek Group. "Our groundbreaking artificial intelligence solutions are not just addressing challenges; they are redefining possibilities. From tackling climate change to optimizing resource use and alleviating the skilled labor shortage, we are pioneering a revolution. At Nemetschek, we don't just create products; we craft comprehensive workflows that reimagine the entire ecosystem of construction and real estate. We are helping the industry constructing a smarter, more sustainable world for generations to come."

### **About the Nemetschek Group**

The Nemetschek Group is a globally leading provider of software for digital transformation in the AEC/O and media industries. Its intelligent software solutions cover the entire life cycle of construction and infrastructure projects and allow creatives to optimize their workflows. Customers can plan,

construct, and manage buildings and infrastructure more efficiently and sustainably, and develop digital content such as visualizations, films, and computer games in a creative way. The software company drives new technologies and approaches such as artificial intelligence, digital twins, and open standards (OPEN BIM) in the AEC/O industries to increase productivity and sustainability. We are continuously expanding our portfolio, including through investments in disruptive start-ups. More than 7 million users are currently designing the world with the customer-focused solutions of our four segments. Founded by Prof. Georg Nemetschek in 1963, the Nemetschek Group today employs more than 3,400 experts.

The company, which has been listed in the MDAX and TecDAX since 1999, achieved a revenue of EUR 851.6 million and an EBITDA of EUR 257.7 million in 2023.
