ALLPLAN 2025-1: Smarter design-tobuild workflows and enhanced interoperability

New service release boosts efficiency and collaboration in digital design

Munich – ALLPLAN, a leading provider of BIM solutions for the AEC industry, introduces a **comprehensive** service release with ALLPLAN 2025-1. The latest enhancements further **streamline design-to-build workflows and strengthen cloud connectivity**, enabling professionals across all disciplines to work faster and more precisely.

"With ALLPLAN 2025-1, we are taking digital workflows to the next level. By combining enhanced structural design capabilities and deeper cloud integration, we empower our users to accelerate projects, improve precision, and boost overall efficiency," says Eduardo Lazzarotto, Chief Product and Strategy Officer at ALLPLAN.

Key Enhancements in ALLPLAN 2025-1

Seamless structural data exchange with SAF integration

The **Structural Analysis Format (SAF)** improves interoperability in BIM projects by facilitating direct imports into BIMPLUS and enabling SAF file tracking and management in Excel. This ensures greater transparency in the planning process and a seamless connection between structural analysis and digital design workflows.

Optimized structural workflows with FRILO by ALLPLAN

The **FRILO BIM-Connector** is now fully integrated into **BIMPLUS**, **streamlining structural engineering workflows**. Engineers can access 3D model data directly from ALLPLAN, SDS2, and other compatible tools. IFC and SAF files can now be imported effortlessly into FRILO, allowing for detailed structural analysis and precise component drawings. These enhancements reduce coordination time and increase design accuracy.

Unified 2D and 3D data management with BIMPLUS and ALLPLAN Exchange

For seamless project coordination, **BIMPLUS and the document management system ALLPLAN Exchange are now fully connected.** This integration allows users to synchronize 2D plans, documents, and 3D models across projects. The new "Copy from Exchange" function makes it easier to select and transfer relevant files directly into BIMPLUS for further processing and collaboration.

Extended cloud functionality and simplified license management

The **new cloud-based license management system** allows users to access ALLPLAN more flexibly, regardless of device or location. Real-time license

monitoring via the ALLPLAN Connect dashboard simplifies administration, making it ideal for hybrid teams.

With these latest advances and multiple minor enhancements, ALLPLAN 2025-1 delivers a significant productivity boost and enhances digital collaboration across the construction industry.

Further information: Features ALLPLAN 2025-1

With the update to ALLPLAN 2025, structural engineers benefit from seamless integration between BIMPLUS and the FRILO BIM-Connector, which makes their workflows more efficient. Copyright: ALLPLAN

In addition to many other file formats, model data in SAF format can now be imported directly into BIMPLUS, which further improves the digital model representation. Copyright: ALLPLAN

About the Nemetschek Group

The Nemetschek Group is a globally leading software provider for the digital transformation in the AEC/O and media industries. Its intelligent software solutions cover the entire lifecycle of construction and infrastructure projects and allow creatives to optimize their workflows. Customers can plan, construct, and manage construction projects more efficiently and sustainably, and develop digital content such as visualizations, films, and computer games in a creative way. The software company drives new technologies such as artificial intelligence, digital twins, and open standards (OPEN BIM) in the AEC/O industries to increase productivity and sustainability and continuously expands its portfolio, including through acquisitions and investments in innovative start-ups. More than 7 million users are currently using the customer-focused solutions. Founded by Prof. Georg Nemetschek in 1963, the Nemetschek Group today employs more around 4,000 experts.

The company, which has been listed in the MDAX and TecDAX since 1999, achieved a revenue of EUR 995.6 million and an EBITDA of EUR 301.0 million in 2024. Since the end of 2024, the Nemetschek Group is certified in accordance with ISO 27001, the internationally recognized standard for information security management systems (ISMS).
