ALLPLAN at the BIM World MUNICH 2022

Munich, November 10, 2022 - At this year's **BIM World MUNICH** from November 22-23, 2022, ALLPLAN, together with the Nemetschek Group, will present **the latest versions of its BIM solutions Allplan 2023 and Allplan Bridge 2023** at booth 16. The focus will be on **Allplan as a platform** for efficient coordination and interdisciplinary collaboration.

Since 2016, BIM World MUNICH has been an annual meeting place focusing on user-related solutions around the modeling of building information as well as new technologies for construction, real estate and urban design. The

event is composed of a two-day international congress and an exhibition with open forums. More than 200 exhibitors and over 200 speakers will provide a diverse program on eight stages.

Dr. Detlef Schneider, CEO of ALLPLAN: *"The trade fair is a must-attend event for all industry players involved in digitalization in the construction sector, and thus also for ALLPLAN. We are looking forward to showing visitors the possibilities of Allplan as a platform that covers the entire design and construction process from initial draft to execution planning for site and precast design."*

ALLPLAN will be presenting the latest version of its BIM software at BIM World MUNICH, which was released at the beginning of October. As a platform for the entire construction industry, Allplan 2023 enables efficient coordination and collaboration between AEC professionals. Interested parties can find out about highlights of the new version at the trade fair stand, including how point clouds can be used for precise planning, how Allplan enables BIM-compliant design with attributes, the opportunities offered by collaboration between Allplan and Solibri, automated precast planning in Allplan and how bridges can be better designed with Allplan Bridge 2023. In addition, sales experts will answer questions about BIM, continuing education and certification.

Breakout sessions: Green BIM

As part of Breakout Session 1, Stefan Kaufmann, Product Manager BIM and New Strategy, will talk about digital solutions for a sustainable circular economy on November 22, 2022 at 2 pm. He will show how BIM-based solutions can be used to maximize effectiveness in design processes and how integrated workflows can be used to counter risks in the modernization and renovation of buildings and structures.

About the Nemetschek Group

The Nemetschek Group is a pioneer for digital transformation in the AEC/O and the media & entertainment industries. With its intelligent software solutions, it covers the entire lifecycle of building and infrastructure projects, guides its customers into the future of digitalization and enables them to shape the world. As one of the leading corporate groups worldwide in this

sector, the Nemetschek Group increases quality in the building process and improves the digital workflow for all those involved. Customers can design, build, and manage buildings more efficiently, sustainably and resource-saving. The focus is on the use of open standards (OPEN BIM). The portfolio also includes digital solutions for visualization, 3D modeling, and animation. The innovative solutions of the brands ALLPLAN, Bluebeam, Crem Solutions, dRofus, FRILO, Graphisoft, Maxon, Nevaris, RISA, SCIA, Solibri, Spacewell and Vectorworks in the four customer-oriented segments are used by approximately 6.5 million users worldwide. Founded by Prof. Georg Nemetschek in 1963, the Nemetschek Group today employs around 3,400 experts all over the world.

Publicly listed since 1999 and quoted on the MDAX and TecDAX, the company achieved revenue amounting to EUR 681.5 million and an EBITDA of EUR 222.0 million in 2021.
