ALLPLAN Cooperates with the CAFM Workshop of Drees & Sommer

The common goal is to promote digitization in facility management

Munich, November 2, 2020 – ALLPLAN and the project planning and consulting company Drees & Sommer have agreed **to cooperate in the CAFM workshop**. The CAFM workshop is an information platform where software providers make their products available for test purposes. Users can obtain comprehensive information about the technical application possibilities. ALLPLAN is one of the newest cooperation partners in the CAFM workshop and contributes with the BIM software Allplan and the **open BIM platform**

Allplan Bimplus.

The decision-making process for a particular CAFM system is often very complex: usability, connectivity, scope of services, future-proofing - the list of requirements is long. In order to lower the hurdles, the consulting firm Drees & Sommer has launched the CAFM workshop with currently eleven providers of CAFM and BIM solutions. Felix Leonhard, Senior Consultant at Drees & Sommer, explains: *"The CAFM workshop is a way of making the digitization potential for facility management tangible before software is purchased. We think this is a good approach. We are pleased that we were able to win ALLPLAN as the leading provider in this area"*.

BIM creates efficiency in facility management

"Drees & Sommer's CAFM workshop offers the opportunity to experience the future of digitization today," says Stefan Kaufmann, Product Manager BIM Strategy & New Technologies at ALLPLAN. *"With the integration of Allplan Bimplus into the MCS 20 IWMS software from our sister company [SPACEWELL](#), we have taken a decisive step towards our goal of seamlessly connecting the AEC industry with end-to-end digital processes. For companies in the facility management sector, BIM-based work processes offer a wide range of potential for optimization and savings"*, continues Stefan Kaufmann.

About the Nemetschek Group

The Nemetschek Group is a pioneer for the digital transformation in the AEC industry. With its software solutions, it covers the complete life cycle of building and infrastructure projects and guides its customers into the future of digitalization. As one of the world's leading corporate groups, the Nemetschek Group increases quality in the construction process and improves the digital workflow of all those involved in the construction process. Leveraging the software, buildings can be planned, built and operated more efficiently, sustainably and in a resource-saving manner. The focus of the Nemetschek Group is on the use of open standards (Open BIM). The portfolio also includes digital solutions for visualization, 3D modeling

and animation. The innovative products of the 16 brands in the four customer-oriented divisions are used by approximately six million users worldwide. Founded by Prof. Georg Nemetschek in 1963, the Nemetschek Group today employs more than 3,000 experts.

Publicly listed since 1999 and quoted on the MDAX and TecDAX, the company achieved revenue in the amount of EUR 556.9 million and an EBITDA of EUR 165.7 million in 2019.
