Allplan, Graphisoft & Vectorworks are partners at the German Architects Day 2023

Munich, September 11, 2023: Construction software manufacturer Graphisoft with its BIM planning solution Archicad is the exclusive partner of the "Digitalization" theme area at the German Architects Day 2023. The event with a congress and supporting program will take place on September 29, 2023 at the BCC - Berlin Congress Center.

The DAT23, the German Architects Day 2023 of the Federal Chamber of Architects, will bring more than 60 speakers from the construction industry to

Berlin this year under the event title "Transformation - Strengthening Spaces". Among them are leading industry experts such as Federal Minister of Construction Klara Geywitz, Camilla van Deurs, Copenhagen's city architect responsible for climate protection, and transformation researcher Prof. Dr. Maja Göpel.

The high-caliber day program consists of various keynotes and wide-ranging panels on the urban-rural continuum and existing buildings, land and use, material use and the circular economy, young talent, leadership, and the value of planning as part of the transformation that will define the work of architects for decades to come.

Graphisoft is this year's exclusive partner of the panel Potentials of Digitization, Robotics, AI, which will take place as part of the extensive day program, and supports the panel with the discussion contribution of Holger Kreienbrink, Director Product Intelligence at Graphisoft. The panel will include digitalization experts such as Prof. Georg Vrachliotis (TU Delft), Kyung-Ae Kim-Nalleweg (Kim Nalleweg Architekt*innen) and Thomas Kirmayr (Managing Director Fraunhofer-Allianz Bau, Head of Mittelstand Digital Zentrum Bau). The strongly user-oriented lecture program is intended to show planners strategies and offers to drive the digital transformation forward in their own everyday work.

For Graphisoft expert Holger Kreienbrink, successful digital transformation is the basis of his work for Graphisoft and the main reason for supporting DAT 2023 as a partner: "For us, transformation means the digitalization of planning. And by that I really mean digitalization, i.e. the recreation and rethinking of processes - and not just the imitation of existing processes with technical aids. With our partnership at the German Architects' Day, we want to accompany architects on their way and show them new concepts and paths for the future."

The panel Potentials of Digitalization, Robotics, AI will be moderated by Gabriele Seitz, Head of the Digitalization Department at the Federal Chamber of Architects in Berlin. The DAT23 is organized by the German Federal Chamber of Architects (BAK). Another highlight of the supporting program is the presentation of the German Interior Architecture Award (DIAP). For the evening of September 29, a festive get-together with a keynote speech on the building turnaround is planned, for which the current Federal Minister of Economics Robert Habeck has been requested.

In addition to Graphisoft, Vectorworks and Allplan are also partners of the German Architects' Day 2023. All three companies belong to the Nemetschek Group, which is one of the pioneers for the digital transformation of the construction industry. The extensive participation of the Nemetschek Group in DAT 2023 is explained by the future-oriented topics that the event will highlight - and which are also the focus of the Munich software group. With a total of 13 brands, the Nemetschek Group supports its customers along the building life cycle with cross-discipline and cross-product, barrier-free solutions and workflows.

About the Nemetschek Group

The Nemetschek Group is a globally leading software provider for digital transformation in the AEC/O and media industries. Its intelligent software solutions cover the entire lifecycle of building and infrastructure projects and enable creatives to optimize their workflows. Customers can design, build, and manage buildings and infrastructures more efficiently and sustainably and develop digital content such as visualizations, films and computer games more creatively. The software provider is driving innovations such as digital twins as well as open standards (OPEN BIM), and sustainability in the AEC/O industry, constantly expanding its portfolio by also investing in deep-tech startups. Currently more than seven million users worldwide are shaping the world with the customer-focused solutions of our four divisions. Founded by Prof. Georg Nemetschek in 1963, the Nemetschek Group today employs around 3,600 experts globally.

Publicly listed since 1999 and quoted on the MDAX and TecDAX, the company generated revenues amounting to EUR 801.8 million and an EBITDA of EUR 257.0 million in 2022.
