

BUILD THE FUTURE

ALLPLAN INFRASTRUCTURE DIGITAL CONFERENCE

Focus on best practices from international engineering firms and practical workflows or everyday design work

Mar 23, 2022 09:35 UTC

ALLPLAN invites Engineering Professionals to Digital Conference on the Future of Infrastructure

Munich, March 23, 2022 - ALLPLAN invites to its second virtual **Build the Future – ALLPLAN Infrastructure Digital Conference** on May 4, 2022. The event will focus on solutions and international practical examples from bridge and road construction. **Eleven exciting specialist presentations** from globally successful engineering firms and Allplan product experts are on the program. Participants can also expect to see what integrated digital infrastructure solutions look like now and in the future, as well as benefit from seeing **practical implementation and workflows** for daily work.

"We want to enable our customers to optimize infrastructure projects for efficiency from design to construction. This is the core of our design-to-build strategy", says Dr. Detlef Schneider, CEO of ALLPLAN. "At our digital conference, we bring together stakeholders in infrastructure projects to network online, learn about trends and prepare for a successful future."

Infrastructure projects from around the world

This virtual conference will kick off with presentations on Allplan infrastructure design solutions for roads and bridges. In addition to presenting the current solutions, product experts will provide tips and tricks for modeling bridges, terrain and roads. A new automated bridge modeling process will be presented, including methods such as parametric modeling with Visual Scripting and PythonParts.

International clients will present infrastructure projects of all sizes and complexity - from the largest infrastructure project in Europe, the Grand Paris Express, to the metro network in Portugal, a railway bridge in Brazil, a road construction project in Switzerland, and several impressive bridge construction projects in China, North America, Croatia, Germany and Romania. The engineers involved will report on best practices and experiences in the course of their projects.

Chat rooms and online discussions with leading engineers

There will be a number of chat rooms, hosted by experts, for online discussion on a broad range of topics from, road, terrain and bridge modeling, bridge analysis, through to reinforcement detailing, BIM and interoperability. The conference will be held in English - in the morning and in the afternoon. Participation is free of charge.

The Nemetschek Group is a pioneer for digital transformation in the AEC/O and the media & entertainment industries. With its intelligent software solutions, it covers the entire lifecycle of building and infrastructure projects, guides its customers into the future of digitalization and enables them to shape the world. As one of the leading corporate groups worldwide in this sector, the Nemetschek Group increases quality in the building process and improves the digital workflow for all those involved. Customers can design, build, and manage buildings more efficiently, sustainably and resource-saving. The focus is on the use of open standards (OPEN BIM). The portfolio also includes digital solutions for visualization, 3D modeling, and animation. The innovative products of the 13 brands of the Nemetschek Group in the four customer-oriented segments are used by approximately 6.5 million users worldwide. Founded by Prof. Georg Nemetschek in 1963, the Nemetschek Group today employs around 3,400 experts all over the world.

Publicly listed since 1999 and quoted on the MDAX and TecDAX, the company achieved revenue amounting to EUR 681.5 million and an EBITDA of EUR 222.0 million in 2021.
