ALLPLAN launches international learning platform ALLPLAN LEARN NOW

New digital learning opportunities and materials for Allplan

Munich, May 13, 2024 - ALLPLAN, provider of BIM solutions for the AEC industry, today announces the international launch of its learning platform ALLPLAN LEARN NOW. It is now available also to customers in France, Austria, Switzerland, Italy, Spain, Slovakia, the Czech Republic and in English worldwide. The learning platform offers numerous freely accessible learning opportunities for the entire planning and construction process - from the initial concept and detailed planning through to prefabrication and construction.

"The launch of the learning platform is an important milestone in ALLPLAN's efforts to make daily work with the software easier for users," says Monika Gronbach, Vice President Technical Services. "With ALLPLAN LEARN NOW, we are creating a new, unique offering for our Allplan software that covers the entire design-to-build process and allows us to exploit the full potential of our software."

Depending on the contract, most of the learning materials developed by experienced AEC experts are available free of charge. Users can choose from a wide range of learning materials, including up-to-date expert articles, explanatory videos, interactive exercises, tips & tricks for using individual functions and features as well as training courses to expand their knowledge and skills relating to the BIM software. They have full control over their individual learning experience and can decide for themselves when and how they want to access the learning materials.

"With ALLPLAN LEARN NOW, we are setting a new standard for learning in the construction industry and providing our customers with an invaluable resource to improve their skills and workflows," adds Monika Gronbach. The learning platform has been developed to shorten the learning curve for users while ensuring effective knowledge transfer. With regular updates and new content, ALLPLAN LEARN NOW is constantly evolving to meet the demands of the modern construction industry.

About the Nemetschek Group

The Nemetschek Group is a globally leading provider of software for digital transformation in the AEC/O and media industries. Its intelligent software solutions cover the entire life cycle of construction and infrastructure projects and allow creatives to optimize their workflows. Customers can plan, construct, and manage buildings and infrastructure more efficiently and sustainably, and develop digital content such as visualizations, films, and computer games in a creative way. The software company drives new technologies and approaches such as artificial intelligence, digital twins, and open standards (OPEN BIM) in the AEC/O industries to increase productivity and sustainability. We are continuously expanding our portfolio, including through investments in disruptive start-ups. More than 7 million users are

currently designing the world with the customer-focused solutions of our four segments. Founded by Prof. Georg Nemetschek in 1963, the Nemetschek Group today employs more than 3,400 experts.

The company, which has been listed in the MDAX and TecDAX since 1999, achieved a revenue of EUR 851.6 million and an EBITDA of EUR 257.7 million in 2023.
