Bundled Competence at BAU 2023: Nemetschek Group Present with Ten Brands

Munich, February 15, 2023 - The construction industry is undergoing change - the digital transformation as one of the main drivers will be particularly in focus at this year's leading trade fair BAU. The Nemetschek Group, one of the world's leading software providers for the construction industry, will present its solutions for the first time together with its brands at a joint stand.

From April 17 to 22, 2023, Messe München will once again be the industry meeting place for the construction industry: with 250,000 visitors and over

2,000 exhibitors from almost 50 countries, BAU is one of the leading events for the construction industry worldwide. The Nemetschek Group uses this large stage to present its solutions for more efficiency and sustainability along the entire construction life cycle together with the ten brands ALLPLAN, Bluebeam, CREM Solutions, dRofus, FRILO, Graphisoft, Nevaris, SCIA, Solibri and Vectorworks. The brands will present themselves for the first time at an impressive joint stand under the umbrella of the Nemetschek Group in Hall C5 booth number 322.

The presence will focus on the topics that are also occupying the industry at the moment: How can improved collaboration help to increase the efficiency of construction projects? What is the potential along the construction lifecycle to improve sustainability and the ecological and energy footprint of buildings? Which influence will cloud technologies and digital twins have on workflows in the construction industry of the future? The Nemetschek booth will offer many opportunities to exchange, explore and inform, including a coffee bar and a presentation area where the brands will present their solutions. In addition to numerous demo opportunities, a few start-ups in which the Nemetschek Group has invested lately, will also be on site to present their innovative solutions.

The Nemetschek Group is one of the pioneers for the digital transformation of the construction industry and is celebrating its 60th company anniversary this year. The joint appearance with ten Nemetschek brands underlines the claim of the group to further optimize the collaboration between individual partners on a construction project with digital solutions in order to minimize time- and resource-intensive friction losses. Together, the Nemetschek Group demonstrates the synergies that can be achieved with its solutions across the entire value chain in the AEC/O industry. The strong, open brands support their customers along the life cycle of buildings with cross-discipline and cross-product, barrier-free solutions and workflows.

“Together with all our exhibiting brands, we will show how our customers and the entire construction industry benefits from the software solutions of the Nemetschek Group today and in the future - especially looking at the major challenges that the industry is facing such as climate protection, the more careful use of resources, or the question of affordable housing,” explains Yves Padrines, CEO of the Nemetschek Group. He adds: “We do not think in terms of products, but in terms of workflows, along the entire value chain in the AEC/O industry. More and more customers want open, combinable, and scalable solutions. This is what we as the Nemetschek Group

have been driving for 60 years."

The goal of the Nemetschek Group is to help all stakeholders in the construction lifecycle to find digital answers to their challenges and at the same time to exploit the enormous potential of digitalization - for an overall better and more sustainable built world.

About the Nemetschek Group

The Nemetschek Group is a pioneer for digital transformation in the AEC/O and the media & entertainment industries. With its intelligent software solutions, it covers the entire lifecycle of building and infrastructure projects, guides its customers into the future of digitalization and enables them to shape the world. As one of the leading corporate groups worldwide in this sector, the Nemetschek Group increases quality in the building process and improves the digital workflow for all those involved. Customers can design, build, and manage buildings more efficiently, sustainably and resource-saving. The focus is on the use of open standards (OPEN BIM). The portfolio also includes digital solutions for visualization, 3D modeling, and animation. The innovative solutions of the brands ALLPLAN, Bluebeam, Crem Solutions, dRofus, FRILO, Graphisoft, Maxon, Nevaris, RISA, SCIA, Solibri, Spacewell and Vectorworks in the four customer-oriented segments are used by approximately 6.5 million users worldwide. Founded by Prof. Georg Nemetschek in 1963, the Nemetschek Group today employs around 3,400 experts all over the world.

Publicly listed since 1999 and quoted on the MDAX and TecDAX, the company achieved revenue amounting to EUR 681.5 million and an EBITDA of EUR 222.0 million in 2021.
