DDScad goes BIMx: Mobile Access to Projects At Any Time

Frankfurt/Main, October 04, 2022 - Graphisoft Building Systems (formerly Data Design System) presented the diverse options for displaying and managing projects planned with DDScad via the BIMx app at Light + Building. Version 18 of the building services design software, which debuted at the show, has been linked to Graphisoft's award-winning presentation tool to help trade professionals and planners can better coordinate with other participants on the construction site and control construction more efficiently. With BIMx, three-dimensional building models, plans and project information can be displayed free of charge on a variety of different devices and operating systems.

Using a new feature in DDScad 18, users quickly transfer the information they want to publish - from the entire model to specific component information - to the app as needed. In BIMx, project data, area information and masses are bundled on a mobile platform and are thus available anywhere and at any time to all construction participants in a paperless manner. This is not only very practical; thanks to the model representation in 3D, specialist tradesmen and planners can also offer their project partners an attractive service.

For this purpose, the application has been enhanced in such a way that, in addition to the building, it now also clearly visualizes electrical installations and, in addition, links the published project information with the displayed building model. This makes it possible, for example, to jump directly from electrical distribution documentation to the switch cabinet in the 3D building model in which a component being searched for is located.

BIMx is available for tablets, smartphones, desktop PCs and as a web app for the browser. For more information, visit bimx.graphisoft.com.

About DDScad

The DDScad product family offers users intelligent tools for electrical and HVAC planning, integrated calculations and comprehensive options for documenting all building systems. With the BIM software solutions, engineering and trade companies plan and implement high-quality building services projects on time and on budget. All DDScad products support OPEN BIM. This ensures that workflows are transparent and that required data is available at all times. It also ensures the longevity of the built facilities.

About Graphisoft

Graphisoft® lets teams create great architecture. This is made possible through award-winning software solutions, training programs and professional services for the AEC/O industry. Archicad® is the BIM software of choice for architects*, providing a complete, seamless design and documentation workflow for architectural and civil engineering firms of all sizes. BIMx®, the most popular mobile and web BIM app, extends the BIM experience and sets the stage for involving all stakeholders in the design,

construction and operational lifecycle of a building. BIMcloud®, the AEC/O industry's first and most advanced cloud-based team collaboration solution, enables real-time global collaboration; regardless of the size of the project and the speed or quality of the team members' network connection. Graphisoft is part of the Nemetschek Group. To learn more, visit www.graphisoft.com.

About the Nemetschek Group

The Nemetschek Group is a pioneer for digital transformation in the AEC/O and the media & entertainment industries. With its intelligent software solutions, it covers the entire lifecycle of building and infrastructure projects, guides its customers into the future of digitalization and enables them to shape the world. As one of the leading corporate groups worldwide in this sector, the Nemetschek Group increases quality in the building process and improves the digital workflow for all those involved. Customers can design, build, and manage buildings more efficiently, sustainably and resource-saving. The focus is on the use of open standards (OPEN BIM). The portfolio also includes digital solutions for visualization, 3D modeling, and animation. The innovative solutions of the brands ALLPLAN, Bluebeam, Crem Solutions, dRofus, FRILO, Graphisoft, Maxon, Nevaris, RISA, SCIA, Solibri, Spacewell and Vectorworks in the four customer-oriented segments are used by approximately 6.5 million users worldwide. Founded by Prof. Georg Nemetschek in 1963, the Nemetschek Group today employs around 3,400 experts all over the world.

Publicly listed since 1999 and quoted on the MDAX and TecDAX, the company achieved revenue amounting to EUR 681.5 million and an EBITDA of EUR 222.0 million in 2021.
