dRofus 2.4 is Live

Superb data quality is the forerunner for excellent decision making across an organisation. The more high-quality data you have access to, the more confidence you will have when difficult decisions need to be made. As William Edwards Deming rightfully said, "without data, you're just another person with an opinion."

The question is... have you been wanting to do more with the data in dRofus? If the answer is yes, then we have a few updates that you and your team will be excited about.
