dRofus and Zynka BIM sign cooperation agreement in Sweden

August 26, 2020 - [dRofus](#) and [Zynka BIM](#) have entered into a cooperation agreement. They are set to combine Zynka Bim's expertise in processes and working methods with dRofus' industry-leading software for digital information management, something that has become important for the building industry.

Zynka BIM sees dRofus as a powerful and well-adapted tool for managing information that a building project includes; everything from requirements such as [Room Data Sheets](#) (RDS) to information about building parts such as doors and fittings. Zynka BIM assists the projects in ensuring that dRofus is properly implemented in the projects, which increases the usefulness of the tool.

"We see a need for this type of software in many projects to ensure that essential requirements and information are filled in by the right party. The benefits of having everything in the same database, together with the broad functionality that dRofus offers, means that the quality and structure of information is maintained through all phases of the project." says **Erik Brännström at Zynka BIM**.

dRofus have chosen to work with Zynka BIM to ensure that customers receive the full benefit of the dRofus software. Zynka BIM will also grow a larger network of dRofus users who will know the intricacies of the software and also have a solid understanding of the processes that the software will support in projects. When implemented correctly, dRofus enables an unbroken supply chain of information in a building project; from requirements through design and construction to facility management

"We have also previously had good cooperation with Zynka BIM in projects, and see this agreement as the next step to jointly help the construction industry move forward in its digitalization journey." says **Marie Salomonsson at dRofus**.

Both dRofus and Zynka BIM are and remain independent companies working with all players in the market.
