dRofus now included on the Hong Kong CITF BIM software pre-approved list

Oslo, 25.03.2021: [dRofus](#) – in conjunction with local HK agent [Forida](#) - recently completed the process of approving its software for listing on the [Hong Kong Construction Industry Council \(CIC\)](#) Scheme known as the [Construction Innovation and Technology Fund \(CITF\)](#).

The Construction Industry Council (CIC) is the peak construction industry body in Hong Kong and aims to forge consensus and drive term innovation led strategy in the local construction industry.

As a key component of this the CIC continues to develop itself as a Centre of Excellence for Building Information Modelling (BIM), with the aim of market transformation and promotion of cross-discipline collaboration and wider adoption of BIM.

At the centre of this is ongoing BIM-related activity is the Construction Innovation and Technology Fund (CITF). This has been established to encourage wider adoption of innovative constructive methods and new technologies in the construction industry with a view to promoting productivity, uplifting built quality, improving site safety and enhancing environmental performance.

The CITF role is to encourage the construction industry to use new and proven technologies developed within or outside Hong Kong and has a total of HK\$1 billion funding.

In that context dRofus is pleased to have undertaken the registration and approval process and now being listed as a pre approved software in the scheme, therefore allowing local clients to gain access to our innovative software and paving the way for greater BIM adoption in Hong Kong via successful supported deployment of dRofus software.

[Mathew Henson](#) of dRofus noted "A number of Hong Kong projects have used dRofus in recent years, but our CITF registration, Mandarin and Cantonese language versions and partnership with Forida reflect important strategic milestones for dRofus in the Asian region. We look forward to working closely with our clients and partners in Hong Kong over the coming years, to better service the local market".

dRofus Project Information is posted on the CITF website for reference of CITF applicants: www.citf.cic.hk

About the Nemetschek Group

The Nemetschek Group is a pioneer for digital transformation in the AEC/O industry. With its intelligent software solutions, it covers the entire lifecycle of building and infrastructure projects and guides its customers into the future of digitalization. As one of the leading corporate groups worldwide in this sector, the Nemetschek Group increases quality in the building process and improves the digital workflow of all those involved in the building process. Customers can design, build and manage buildings more efficiently, sustainably and resource-saving. The focus is on the use of open standards (OPEN BIM). The portfolio also includes digital solutions for visualization, 3D modeling, and animation. The innovative products of the 15 brands of the Nemetschek Group in the four customer-oriented segments are used by approximately six million users worldwide. Founded by Prof. Georg Nemetschek in 1963, the Nemetschek Group today employs more than 3,000 experts.

Publicly listed since 1999 and quoted on the MDAX and TecDAX, the company achieved revenue amounting to EUR 596.9 million and an EBITDA of EUR 172.3 million in 2020.
