dRofus Web – Changing the way you access data in the AEC industry

You now have the ability to view and edit your dRofus project data on any web browser and on any mobile device using dRofus Web. Do you remember a time when you were on site or on the road and needed to access or edit a vital piece of information and couldn't? Now you can search, view and edit your dRofus project data on any mobile device, at no additional cost and with no download required.

Let's take a deeper dive...

Building owners need dRofus Web

dRofus Web has been proven useful to project owners as it gives them access to information that really matters. Through the intuitive platform it is easy to gain a high-level overview of a project. For example, if you organize groups in dRofus, you can visualize floor plans in the IFC viewer. If you have a group for floor types with a colour map, in the 3d viewer you will see how they are placed in the project. The building owner has the chance to spot an incorrect entry and make a correction. When the database is synchronized to ArchiCAD, Revit or any BIM authoring tool it will obtain the correct values.

Edit data at any time

A major breakthrough is the ability to edit data on your browser. You're able to make quick edits and minor changes when you may need them most. This is incredibly useful for when you need to update the database and don't have a desktop nearby.

'On-the-go' collaboration with team members and key stakeholders

Collaboration is key in the modern AEC landscape and with dRofus Web you have ability to easily search and share links to specific sections in the database. For example, if an architect is looking to find information on an air handling unit, it is simply a quick search, click to copy the link to your clipboard and share with a team member or contractor.

dRofus Web is Free

As long as you are working on a project that uses dRofus, access to the web viewer is free. The real kicker is that when you sign up with dRofus, you can create unlimited users for your project and each one of them has access to the web viewer. No additional fees are added.

Cross platform

dRofus WEB enables you to view your project data elsewhere than behind your PC logged into the dRofus Client. Your project data can now be accessed using Apple iOS, Ubuntu, MS-Windows and a plethora of other operating systems.

No download required

There is no need to download an app from the App Store or Google Play. Access to dRofus web can be done simply through your web browser and your dRofus log in details.

Easy to navigate and search for data

The powerful search function makes it easy for you to quickly find the information that you need. Whether it be rooms, items, systems, occurrences or products, the information is right at your fingertips.

3d model viewer

You can visualise the model in 3D viewer. You can navigate either by the functional structure, or any room group or classification in your project. You can also navigate based on the IFC structure, which will appear when an IFC

model is connected

If your project is hosted on any of the locations listed below you can login and start browsing your data now:

USA and South America <https://web-us.drofus.com/>

Canada <https://web-ca.drofus.com/>

Europe <https://app-db2.drofus.com/>

Australia, Asia and New Zealand <https://web-au.drofus.com/>

If you would like to get started with dRofus simply [click here](#) and let's start building a data driven project together.

About the Nemetschek Group

The Nemetschek Group is a pioneer for the digital transformation in the AEC industry. With its software solutions, it covers the complete life cycle of building and infrastructure projects and guides its customers into the future of digitalization. As one of the world's leading corporate groups in this field, the Nemetschek Group increases quality in the construction process and improves the digital workflow of all those involved in the construction process. This revolves around the use of open standards (Open BIM). The innovative solutions of the 16 brands in the four customer-oriented divisions are used by approximately six million users worldwide. Founded by Prof. Georg Nemetschek in 1963, the Nemetschek Group today employs more than 3,000 experts.

Publicly listed since 1999 and quoted on the MDAX and TecDAX, the company achieved revenue in the amount of EUR 556.9 million and an EBITDA of EUR 165.7 million in 2019.
