Enscape Releases Version 2.9 With Vectorworks 2021 Integration

Milestone release adds Vectorworks to Enscape's list of fully supported 3D modeling programs

Columbia, MD (**November 5, 2020**)—Enscape GmbH, the leading provider of real-time rendering and virtual reality technology for the global architecture, engineering and construction (AEC) industry, has launched Enscape 2.9. This release supports Vectorworks 2021 from global design and BIM software provider Vectorworks, Inc. and allows architects, landscape design professionals and entertainment designers to add Enscape to their

Vectorworks planning and presentation workflows.

"This partnership confirms our dedication to integrating new technology that brings direct benefits to customers," said Dave Donley, director of product technology at Vectorworks. "Enscape does a marvelous job creating nice workflows and developing plug-ins that allow users to add Enscape objects directly into their Vectorworks models. We're confident users will enjoy the Vectorworks 2021 features now that Enscape fully supports Vectorworks 3D modeling."

Unlike traditional rendering software, Enscape leverages innovations in graphics card technology to instantly transform Vectorworks models into immersive real-time 3D experiences. Vectorworks users can quickly navigate large BIM models, and changes made in Vectorworks are immediately visible and fully rendered with accurate materials, lighting and shadows.

As a result, designers can see in real-time the effect their design decisions have on a space and its construction, helping them validate their ideas and get to decision points faster. Design teams can walk through a project to understand spatial relationships and perform visual inspections to identify errors that may be missed in the plan review. Enscape offers firms a new way to communicate with clients to ensure designs meet their visions.

"We're pleased to partner with Vectorworks to bring Enscape's real-time 3D rendering and virtual reality technology to Vectorworks users," said Daniel Monaghan, Enscape's business leader in the Americas. "Like Vectorworks' integrated rendering features, Renderworks, Enscape plugs directly into the Vectorworks interface, so it's very easy to learn and use. If you know how to add a light and texture in Vectorworks, you already know how to use Enscape — the results are just instant."

Enscape for Vectorworks is available on the Windows operating system in English, German, Spanish, French, Italian and Portuguese. Users can try Enscape free for 14 days here.

About Enscape GmbH

Enscape, based inKarlsruhe,Germany, andNew York, was founded in 2017 and has established itself firmly in the international architecture, engineering, and construction (AEC) industry. Its product enables users to create live, high-quality real-time 3D renderings and virtual reality scenes from today's most popular modeling and BIM software. Companies from 150 countries and 85% of the internationally renowned TOP100 architectural firms use Enscape to improve their design process. For more information, visitwww.enscape3d.com.

About Vectorworks, Inc.

Vectorworks, Inc. is an award-winning design and BIM software provider serving the architecture, landscape architecture and entertainment industries in 85 countries. Creating intuitive software since 1985, we've become the preeminent software built to manage the entire design process. Globally more than 685,000 users are creating, connecting and influencing the next generation of design with Vectorworks on Mac and Windows. Headquartered in Columbia, Maryland, with offices in Newbury and London, England and Vancouver, Canada, Vectorworks is a part of the Nemetschek Group. Learn how we empower designers to create experiences that transform the world at vectorworks.net or follow @Vectorworks.

About the Nemetschek Group

The Nemetschek Group is a pioneer for the digital transformation in the AEC industry. With its software solutions, it covers the complete life cycle of building and infrastructure projects and guides its customers into the future of digitalization. As one of the world's leading corporate groups, the Nemetschek Group increases quality in the construction process and improves the digital workflow of all those involved in the construction process. Leveraging the software, buildings can be planned, built and operated more efficiently, sustainably and in a resource-saving manner. The focus of the Nemetschek Group is on the use of open standards (Open BIM). The portfolio also includes digital solutions for visualization, 3D modeling and animation. The innovative products of the 16 brands in the four customer-oriented divisions are used by approximately six million users worldwide. Founded by Prof. Georg Nemetschek in 1963, the Nemetschek

Group today employs more than 3,000 experts.

Publicly listed since 1999 and quoted on the MDAX and TecDAX, the company achieved revenue in the amount of EUR 556.9 million and an EBITDA of EUR 165.7 million in 2019.
