Graphisoft's Archicad Collaborate makes leading BIM technology more accessible through new subscription offering

BUDAPEST, March 21, 2023 — Graphisoft, the leading Building Information Modeling (BIM) software solutions developer for architecture and engineering, today introduced Archicad Collaborate. This subscription-based offer combines award-winning Archicad for architectural design with BIMcloud SaaS for fast, efficient, secure access to shared projects in real-time — all at an affordable price point.

Unlike other BIM software providers that charge additional fees for cloud services, Archicad Collaborate lowers the barrier to entry by offering award-winning BIMcloud SaaS as part of the Archicad subscription price in the user-friendly online Graphisoft Store. "Customers demand powerful solutions that are easy to acquire, learn, and use," said Márton Kiss, Vice President of Product Success at Graphisoft. "Archicad Collaborate allows practices to acquire both Archicad and BIMcloud SaaS at a price even smaller firms can afford."

Archicad Collaborate includes:

- **Archicad**— a robust design solution with a world-renowned user-friendly interface that makes it the most efficient and intuitive BIM software on the market.
- **BIMcloud Software as a Service** — users access their data via a secure cloud solution for fast, flexible, secure access to shared projects in real time.
- Exclusive data and collaboration services that maximize the value of the subscription, including access to **Graphisoft Learn** courses and training materials; emergency licenses and technical support; **Redshift by Maxon**, a high-end rendering tool; **PARAM-O**, a parametric object design tool; the **Library Part Maker** add-on for creating detailed Library objects; and **Python API** for customized and automated Archicad workflows.

When asked about the benefits of using Archicad with BIMcloud SaaS, Peter Snellman, Partner and Design Director at Tillberg Design said, "Working on the same Archicad model from different countries, we have fewer problems."

"With Archicad Collaborate, you can start your project on BIMcloud SaaS, a secure cloud platform built for sharing and collaborating with your team — without additional hardware investments or IT experience," Márton Kiss added. "Using Archicad's powerful and proven tools, you can design great buildings with your team and share them with customers and clients — anywhere in the world."

Archicad Collaborate is now available in select markets in the Graphisoft Store. Visit Archicad Collaborate for more information and to subscribe. Graphisoft offers customers a choice — contact your local Graphisoft Partner for more licensing options, including perpetual licenses.

About Archicad

Designprojects of any size with Archicad's powerful built-in tools and user-friendly interface that make it the most efficient and intuitive BIM software on the market. Graphisoft's award-winning software solution supports OPEN BIM for workflow transparency, longevity, and data accessibility for built assets. Featuring out-of-the-box design documentation, one-click publishing, photo-realistic rendering, and best-in-class analysis, Archicad lets architects focus on what they do best: design great buildings. [Discover Archicad](#).

About BIMcloud SaaS

[BIMcloud Software as a Service](#) enables real-time, secure teamwork between architects and other professionals in the cloud. With a BIMcloud SaaS subscription, users can access their dedicated BIMcloud hosted and managed by Graphisoft. No IT setup is required – simply launch the service to share Teamwork projects in the cloud.

About Graphisoft

[Graphisoft](#)® empowers teams to design great buildings through award-winning software solutions, learning programs, and professional services for the AEC industry. Our award-winning products and solutions support OPEN BIM for workflow transparency, longevity, and data accessibility for built assets. **Archicad**®, the architects' BIM software of choice, offers a complete end-to-end design and documentation workflow for architectural and integrated architectural and engineering practices of any size. **BIMx**®, the most popular mobile and web BIM app, extends the BIM experience to include all stakeholders in the building design, delivery, and operations lifecycle. **BIMcloud**®, the AEC industry's first and most advanced cloud-based team collaboration solution, makes real-time collaboration possible across the globe regardless of the size of the project and the speed or quality of the team members' network connection. **DDScad** solutions support users with intelligent Mechanical, Electrical, and Plumbing (MEP) design tools, integrated calculations, and comprehensive documentation of all building system disciplines. **DDScad Architect & Construction** is developed for architects, building contractors, and industrialized timber frame housing manufacturers in Scandinavian markets. Graphisoft is part of the Nemetschek Group. To learn more, visit [graphisoft.com](#).

About the Nemetschek Group

The Nemetschek Group is a pioneer for digital transformation in the AEC/O and the media & entertainment industries. With its intelligent software solutions, it covers the entire lifecycle of building and infrastructure projects, guides its customers into the future of digitalization and enables them to shape the world. As one of the leading corporate groups worldwide in this sector, the Nemetschek Group increases quality in the building process and improves the digital workflow for all those involved. Customers can design, build, and manage buildings more efficiently, sustainably and resource-saving. The focus is on the use of open standards (OPEN BIM). The portfolio also includes digital solutions for visualization, 3D modeling, and animation. The innovative solutions of the brands ALLPLAN, Bluebeam, Crem Solutions, dRofus, FRILO, Graphisoft, Maxon, Nevaris, RISA, SCIA, Solibri, Spacewell and Vectorworks in the four customer-oriented segments are used by approximately 6.5 million users worldwide. Founded by Prof. Georg Nemetschek in 1963, the Nemetschek Group today employs around 3,400 experts all over the world.
