Green IT continues to gain ground at ALLPLAN

Another award for socio-ecological impact through partnership with AfB social & green IT

Munich, 26 September 2024 - ALLPLAN, one of the leading providers of BIM solutions for the AEC industry, is once again underlining its **commitment to sustainable IT solutions**. As part of the long-standing partnership with AfB social & green IT, a total of **579 discarded IT and mobile devices** were **processed in an environmentally friendly manner** from January 1, 2022 to July 19, 2024. This benefited both the environment and social causes. 69% of the devices could be remarketed after secure data destruction and technical

refurbishment, while the remaining devices were professionally recycled.

The results of this sustainable collaboration have now been presented to ALLPLAN in the form of an **impact certificate**. The partnership resulted in impressive savings over the period mentioned, including the **reduction of 63,841 kWh of energy**, the **saving of 245,913 liters of water** and the **avoidance of 491,528 kg of CO₂ emissions**. The award confirms ALLPLAN's ongoing commitment to creating a sustainable IT landscape and maximizing the useful life of hardware. The use of remanufactured technology is a decisive step towards minimizing the ecological footprint and protecting the environment.

"We are proud of this renewed recognition of our efforts in the area of green IT," says Markus Gallenberger, Chief Marketing and Sales Enablement Officer at ALLPLAN. "The cooperation with AfB clearly shows how important the conscious use of IT hardware is. We will continue to focus on sustainable solutions in the future in order to further reduce our ecological footprint."

AfB social & green IT is Europe's largest non-profit IT company specializing in the refurbishment and remarketing of used IT hardware. By working with companies such as ALLPLAN, AfB helps to extend the life cycle of IT equipment and reduce electronic waste.

About the Nemetschek Group

The Nemetschek Group is a globally leading provider of software for digital transformation in the AEC/O and media industries. Its intelligent software solutions cover the entire life cycle of construction and infrastructure projects and allow creatives to optimize their workflows. Customers can plan, construct, and manage buildings and infrastructure more efficiently and sustainably, and develop digital content such as visualizations, films, and computer games in a creative way. The software company drives new technologies and approaches such as artificial intelligence, digital twins, and open standards (OPEN BIM) in the AEC/O industries to increase productivity and sustainability. We are continuously expanding our portfolio, including through investments in disruptive start-ups. More than 7 million users are currently designing the world with the customer-focused solutions of our four segments. Founded by Prof. Georg Nemetschek in 1963, the Nemetschek Group today employs more than 3,400 experts.

The company, which has been listed in the MDAX and TecDAX since 1999, achieved a revenue of EUR 851.6 million and an EBITDA of EUR 257.7 million in 2023.
