Health New Zealand Selects dRofus to Standardize and Scale Healthcare Facility Planning Nationwide

Munich / Oslo / Wellington / Sydney, October 27, 2025 – [Health New Zealand \(Te Whatu Ora\)](#) has signed a long-term national agreement to implement [dRofus](#), Nemetschek's leading planning and data management solution, across its healthcare infrastructure projects. This strategic move marks a major step toward standardizing healthcare facility planning and data management across the country and supports New Zealand's broader goal of delivering high-quality, future-ready healthcare environments.

With this agreement, Health New Zealand will leverage dRofus to support the

implementation of national healthcare facility standards, enable consistent project delivery methods, enhance budgeting and procurement of major medical equipment and FF&E, and contribute to their Asset Management Information System (AMIS) program, which aligns with the National Data Standard currently under development.

dRofus is a unique, purpose-built software for planning and managing data in building projects. It provides all stakeholders – from planners to designers, contractors, and owners – with a central database for managing requirements, equipment, room data, and BIM models. The platform is particularly well-suited for complex projects in sectors such as healthcare, transportation, and education, where data consistency, collaboration, and change management are critical.

“Health New Zealand is building a foundation for long-term excellence in healthcare infrastructure,” said Sunil Pandita, Chief Division Officer Planning & Design and Digital Twin Business Unit at the Nemetschek Group. “This national agreement reflects their commitment to innovation and standardization, and we are honored that dRofus will play a central role in supporting their goals.”

“This is a major step for Health New Zealand,” said Margo Kyle, GM National Health Facility Planning. “Our goal is to ensure consistent, high-quality healthcare environments across the country. dRofus offers the robust data and planning tools we need to deliver this vision, from early planning to construction and beyond.”

Initially, the agreement will support two major projects, with broader deployment in multiple stages. The long-term ambition is for all healthcare facility projects across New Zealand to utilize dRofus as part of a unified digital planning and asset management ecosystem.

“Working with Health New Zealand is a significant validation of the capabilities and flexibility of dRofus,” said Chris Razzell, Managing Director of dRofus. “We are thrilled to support their ambitious goals and help establish best-in-class data and project delivery standards that will benefit all stakeholders in the New Zealand healthcare system.”

This agreement highlights the Nemetschek Group’s continued commitment to advancing digital solutions in the AEC/O industry and underscores the role of

dRofus in driving digital transformation at scale.

About Health New Zealand

Health New Zealand is responsible for improving services and outcomes across the health system. Te Whatu Ora is 'the weaving of wellness'. We're dedicated to ensuring excellent healthcare for the people of New Zealand. Health New Zealand | Te Whatu Ora provides public health services for New Zealanders at a national, regional and local level. Te Mauri o Rongo – The New Zealand Health Charter is the foundation for how we provide healthcare that meets the needs of all people in New Zealand.

About dRofus

dRofus is a data-driven planning and management platform that serves as the single source of truth for building information throughout the entire project lifecycle. Purpose-built for the architecture, engineering, and construction (AEC) industry, dRofus centralizes data, connects teams, and ensures accuracy from early design through to handover. Its cloud-based platform enables seamless collaboration, reduces errors, and helps organizations deliver projects efficiently and consistently. By integrating deeply with leading BIM tools, dRofus empowers better decisions, supports compliance, and drives long-term building performance. dRofus is a member of the Nemetschek Group.

About the Nemetschek Group

The Nemetschek Group is a globally leading software provider for the digital transformation in the AEC/O and media industries. Its intelligent software solutions cover the entire lifecycle of construction and infrastructure projects and allow creatives to optimize their workflows. Customers can plan, construct, and manage construction projects more efficiently and sustainably, and develop digital content such as visualizations, films, and computer games in a creative way. The software company drives new technologies such

as artificial intelligence, digital twins, and open standards (OPEN BIM) in the AEC/O industries to increase productivity and sustainability and continuously expands its portfolio, including through acquisitions and investments in innovative start-ups. More than 7 million users are currently using the customer-focused solutions. Founded by Professor Georg Nemetschek in 1963, the Nemetschek Group today employs over 4,000 experts globally.

The company, which has been listed in the MDAX and TecDAX since 1999, achieved a revenue of EUR 995.6 million and an EBITDA of EUR 301.0 million in 2024. Since the end of 2024, the Nemetschek Group is certified in accordance with ISO 27001, the internationally recognized standard for information security management systems (ISMS).
