Innovation in the Built Environment: Nemetschek Group Exhibits Together with Seven Brands at Digital Construction Week 2023

Munich, May 10, 2023 – Digital Construction Week 2023 opens its doors at the Excel in London next Wednesday. The Nemetschek Group, one of the world's leading software providers for the construction industry, is exhibiting with seven brands and several startups at a joint booth including an Innovation Area.

Digital Construction Week (DCW) is UK's leading event for the digital construction industry and brings together innovators, designers, and entrepreneurs across the building lifecycle. The Nemetschek Group is leveraging the show to present its solutions for greater efficiency and sustainability along the entire building lifecycle together with the seven brands Bluebeam, dRofus, FRILO, Graphisoft, SCIA, Solibri and Vectorworks and several startups, such as LiveCosts.com, Preoptima, SmartPM und SymTerra. The focus will be on the topics that are keeping the industry busy at the moment: How can improved collaboration help increase the efficiency of construction projects? What potential exists along the construction lifecycle to improve sustainability and the carbon footprint of buildings? What impact will digital twins have on the construction industry of the future? The exhibiting brands and startups will present their solutions to those questions at a joint booth under the umbrella of the Nemetschek Group at booths D450, 550, 650, 652, 665 and 657.

“We are excited to have our brands joining forces on one Nemetschek Group booth to represent our product portfolio and workflows for a digital construction lifecycle at the DCW in London.”, says Yves Padrines, CEO Nemetschek Group. “I am also very proud to have such a great lineup of our venture investments in startups at the stand, showing powerful and disruptive solutions for the industry.”

The Nemetschek booth offers many opportunities for exchanging, exploring, and informing, including a coffee bar, lounge area and an Innovation Area, where visitors and journalists have to possibility to learn more about the solutions of several innovative startups, the Nemetschek Group supported financially in the past two years.

At DCW 2023, SymTerra, the construction management software for real time updates and reporting from site, will present their new innovation SymPlan – a scheduling and workflow feature that for the first time connects scheduling, BIM and construction management with the full supply chain on one platform.

The Nemetschek Group and its brands are also represented with various speaking slots during the two days:

Wednesday, May 17

10:45am – 11:00am @ Tech Stage

“Skyrocket your productivity using these top 5 features from Bluebeam”
Anthony Roberts (Account Development Executive, Bluebeam)

11am – 11:15am @ Tech Stage

“Secret Shortcuts to boost your productivity with Bluebeam”
Adam Kent (Account Development Executive, Bluebeam)

12:30pm – 01:15pm @ Main Stage

Building Lifecycle Intelligence – The Universal Remedy for the Construction Industry?

Panel Discussion moderated by Fred Mills, CEO of The B1M

Speakers: Alexander Haugg (BIM Customer Success, dRofus), César Flores Rodríguez (Chief Division Officer Operate & Manage and Business Unit Digital Twin, Nemetschek Group), James Chambers (Director Global Industry Development for the Build & Construct Division, Nemetschek Group), Lee Morris (Managing Director UK, Solibri), Martyn Horne (Director of Digital Practice, Vectorworks), Rob Kalocay (Director Customer Success, Graphisoft)

1:00pm – 1:30pm @ Transformation Hub

James Chambers (Director Global Industry Development for the Build & Construct Division, Nemetschek Group)

Visitors are also cordially invited to the Nemetschek BIM Tonic Happy Hour on Wednesday, 17 May, at 4pm at the booth.

About the Nemetschek Group

The Nemetschek Group is a globally leading software provider for digital transformation in the AEC/O and media industries. Its intelligent software solutions cover the entire lifecycle of building and infrastructure projects and enable creatives to optimize their workflows. Customers can design, build, and manage buildings and infrastructures more efficiently and sustainably and develop digital content such as visualizations, films and computer games more creatively. The software provider is driving innovations such as digital twins as well as open standards (OPEN BIM), and sustainability in the AEC/O industry, constantly expanding its portfolio by also investing in deep-tech startups. Currently more than seven million users worldwide are shaping the world with the customer-focused solutions of our four divisions. Founded by Prof. Georg Nemetschek in 1963, the Nemetschek Group today employs around 3,600 experts globally.

Publicly listed since 1999 and quoted on the MDAX and TecDAX, the company generated revenues amounting to EUR 801.8 million and an EBITDA of EUR 257.0 million in 2022.
