## More proximity to customers for the north

**Lüneburg, 22.03.2021: Data Design System (DDS) has opened a new branch office in Lüneburg, Lower Saxony. The branch office in the Hanseatic city is the first one in northern Germany and will serve from now on as a sales, consulting, and training location. The company, which develops the building technology planning software DDS-CAD, is thus expanding its services for customers and interested parties in this part of the Federal Republic of Germany.**

"From Lüneburg, the whole of Lower Saxony as well as Hamburg, Schleswig-

Holstein and Mecklenburg-West Pomerania are easily accessible. This means we are closer to our customers and more visible in the region. Thanks to the location close to the train station, it is also very easy to visit us - for example, for a DDS-CAD training course," explains Bernd Kirmes, local DDS contact person.

For this purpose, the new branch office at Stresemannstrasse 1 has its own training area. As soon as face-to-face events are possible again, the company will conduct DDS-CAD training courses there in electrical engineering as well as sanitary and heating engineering. The first test training sessions with a reduced number of participants were already held last year. In addition, the trainers based in Lüneburg will also train customers individually on site at their premises. This will increase both - the range of seminars on offer and flexibility for customers in northern Germany.

Due to the current pandemic situation, Data Design System has decided not to hold an opening ceremony. The branch office is the seventh location of the software house in Europe.

## **About the Nemetschek Group**

The Nemetschek Group is a pioneer for digital transformation in the AEC/O industry. With its intelligent software solutions, it covers the entire lifecycle of building and infrastructure projects and guides its customers into the future of digitalization. As one of the leading corporate groups worldwide in this sector, the Nemetschek Group increases quality in the building process and improves the digital workflow of all those involved in the building process. Customers can design, build and manage buildings more efficiently, sustainably and resource-saving. The focus is on the use of open standards (OPEN BIM). The portfolio also includes digital solutions for visualization, 3D modeling, and animation. The innovative products of the 15 brands of the Nemetschek Group in the four customer-oriented segments are used by approximately six million users worldwide. Founded by Prof. Georg Nemetschek in 1963, the Nemetschek Group today employs more than 3,000 experts.

Publicly listed since 1999 and quoted on the MDAX and TecDAX, the company achieved revenue amounting to EUR 596.9 million and an EBITDA of EUR 172.3 million in 2020.
