Nemetschek Group joins the Kennedy network of Madaster

- Madaster enables the design and use of buildings as commodity banks
- Nemetschek is the first software company in Kennedy network
- Kennedy network grows to a total of 23 companies

Berlin/Munich, November 18, 2021 – The Nemetschek Group, one of the world's leading software vendors for the AEC/O industry, joins the Madaster Kennedy Network as the 23rd company. This expands the network to include a

crucial aspect of the value chain: software solutions for the construction lifecycle. Madaster is the global cadaster for materials, buildings, and infrastructure. With the Nemetschek Group, expertise and know-how for the digital planning and implementation of construction projects are strengthened. Architecture and planning offices can thus realize sustainable buildings more easily and promote the reuse of materials.

Madaster is an online platform for materials. It creates transparency about material values and provides a trusted source of data. At the same time, it establishes an ecosystem that brings together solutions, architects, project developers, banks, asset managers, and the public sector. With the Nemetschek Group, an established and innovative company, there is now more support for the Madaster platform.

With Madaster, every registered building receives a material passport, on which the material quantity, reusability potential, material value, and the current residual raw material value are shown. This new transparency about material values and properties creates a reliable source of data to plan ahead for the long-term reuse of building elements and materials in future projects. The partner companies that work closely with Madaster are called Kennedys. Other Kennedys in the Madaster network – besides the Nemetschek Group – include architecture and engineering firms, as well as companies such as Berlin Hyp, Schüco, Kondor Wessels, and Vonovia.

“Just like Madaster, we look at the entire life cycle of buildings. With digital solutions, all those involved can design, construct, and manage buildings more efficiently and thus more sustainably and with less impact on resources,” says Dr. Axel Kaufmann, CFOO and Spokesman of the Executive Board of the Nemetschek Group. “The online platform Madaster is an innovative, pioneering approach for a more sustainable construction industry. We are very much looking forward to collaborating with them.”

“Everything starts with planning. We are therefore particularly pleased that the Nemetschek Group, an established and innovative company with many years of software expertise, is supporting us in the Kennedy network. This will enable us to offer architecture and planning offices even more precise solutions and interfaces when using the Madaster platform. At the same time, we will continue to push the topic of BIM interface and automatic upload,” says Dr. Patrick Bergmann, Managing Director of Madaster Germany.

About the Nemetschek Group

The Nemetschek Group is a pioneer for digital transformation in the AEC/O industry. With its intelligent software solutions, it covers the entire lifecycle of building and infrastructure projects and guides its customers into the future of digitalization. As one of the leading corporate groups worldwide in this sector, the Nemetschek Group increases quality in the building process and improves the digital workflow of all those involved in the building process. Customers can design, build and manage buildings more efficiently, sustainably and resource-saving. The focus is on the use of open standards (OPEN BIM). The portfolio also includes digital solutions for visualization, 3D modeling, and animation. The innovative products of the 15 brands of the Nemetschek Group in the four customer-oriented segments are used by approximately six million users worldwide. Founded by Prof. Georg Nemetschek in 1963, the Nemetschek Group today employs more than 3,000 experts.

Publicly listed since 1999 and quoted on the MDAX and TecDAX, the company achieved revenue amounting to EUR 596.9 million and an EBITDA of EUR 172.3 million in 2020.

About Madaster

Madaster is the global online platform that enables the circular use of products and materials in the construction industry. The Madaster platform provides real estate owners and other stakeholders with the ability to store, manage, enrich, and share data from their properties. Madaster automatically processes IFC files (BIM software) and enriches them with data from other public and non-public sources. Madaster creates transparency on material values by creating material passports. The platform generates insights into the financial valuation, sequestered carbon, toxicity and reuse potential of the materials, components and products used. Data security, privacy and availability are monitored by an independent body, Stichting Madaster Foundation.

About the Nemetschek Group

The Nemetschek Group is a globally leading software provider for digital transformation in the AEC/O and media industries. Its intelligent software solutions cover the entire lifecycle of building and infrastructure projects and enable creatives to optimize their workflows. Customers can design, build, and manage buildings and infrastructures more efficiently and sustainably and develop digital content such as visualizations, films and computer games more creatively. The software provider is driving innovations such as digital twins as well as open standards (OPEN BIM), and sustainability in the AEC/O industry, constantly expanding its portfolio by also investing in deep-tech startups. Currently more than seven million users worldwide are shaping the world with the customer-focused solutions of our four divisions. Founded by Prof. Georg Nemetschek in 1963, the Nemetschek Group today employs around 3,600 experts globally.

Publicly listed since 1999 and quoted on the MDAX and TecDAX, the company generated revenues amounting to EUR 801.8 million and an EBITDA of EUR 257.0 million in 2022.
