## Nemetschek Recognized as a Leader in the 2025 Verdantix Green Quadrant for Construction Management Software

Munich, Germany – 1 July 2025 – The [Nemetschek Group](#), a global leader in AEC/O (Architecture, Engineering, Construction and Operations) and media & entertainment software solutions, is proud to announce that it has been recognized as a Leader in the 2025 Verdantix Green Quadrant: Construction Management Software report.

The Green Quadrant report, published by independent research and advisory firm Verdantix, is the result of an in-depth evaluation including a comprehensive questionnaire and a live demonstration. The assessment

highlights the strengths of key Nemetschek brands, including GoCanvas, Bluebeam, Nevaris, and dTwin.

“We are very excited that Nemetschek has been named a Leader in the 2025 Verdantix Construction Management Green Quadrant,” said Usman Shuja, Member of the Executive Board, Chief Division Officer Build & Construct and CEO of Bluebeam. “This recognition underscores the value of our open, integrated software solutions and the continued innovation driven by our world-class brands. We’re proud to support the construction industry with technologies that enable efficiency, transparency, and sustainable outcomes.”

According to the report, Nemetschek offers market-leading integration capabilities, earning very high scores in data integration (2.1 out of 3.0) compared to the category average of 1.5. The company supports over 1,000 third-party connections, many of which are enabled through the GoCanvas platform. Nemetschek delivers a robust portfolio through its Build & Construct Division, which includes Bluebeam for document mark-up and collaboration, GoCanvas for field operations and compliance, Nevaris for ERP and project estimation, and dTwin for digital twin-based lifecycle insights.

The report states that the company’s solutions are particularly well-suited for construction projects of all sizes, providing scalable and user-friendly tools that are ideal for firms adopting construction management software for the first time. Looking ahead, Nemetschek plans to enhance its offerings with AI-powered automation, improved predictive analytics, and sustainability-focused features, such as low-carbon material selection

“Adoption of construction management software has increased dramatically as the construction industry faces labour challenges, squeezed profit margins and tariff hikes. This momentum is driving innovation in platforms to meet the industry’s growing demands for productivity, regulatory compliance and seamless data continuity,” said Sophie Planken-Bichler, Analyst at Verdantix. “Innovative companies, like Nemetschek, are transforming construction management by providing digital tools that simplify even the most complex projects, enabling construction teams to work smarter together and deliver results faster.”

The Nemetschek Group’s strong showing in the quadrant reflects its holistic approach to digital construction management and its commitment to open standards and interoperability. Highlighted in the evaluation were:

- **GoCanvas** – enabling mobile-first field data capture and safety workflows
- **Bluebeam** – streamlining document collaboration, markup and drawing reviews for construction professionals
- **Nevaris** – delivering integrated construction ERP and project management capabilities
- **dTwin** – offering next-generation digital twin technology to unify data and insights across the asset lifecycle

## About the Nemetschek Group

The Nemetschek Group is a globally leading software provider for the digital transformation in the AEC/O and media industries. Its intelligent software solutions cover the entire lifecycle of construction and infrastructure projects and allow creatives to optimize their workflows. Customers can plan, construct, and manage construction projects more efficiently and sustainably, and develop digital content such as visualizations, films, and computer games in a creative way. The software company drives new technologies such as artificial intelligence, digital twins, and open standards (OPEN BIM) in the AEC/O industries to increase productivity and sustainability and continuously expands its portfolio, including through acquisitions and investments in innovative start-ups. More than 7 million users are currently using the customer-focused solutions. Founded by Prof. Georg Nemetschek in 1963, the Nemetschek Group today employs more around 4,000 experts.

The company, which has been listed in the MDAX and TecDAX since 1999, achieved a revenue of EUR 995.6 million and an EBITDA of EUR 301.0 million in 2024. Since the end of 2024, the Nemetschek Group is certified in accordance with ISO 27001, the internationally recognized standard for information security management systems (ISMS).
