## SDS2 Summit 2021

**Lincoln, Nebraska, September 14, 2021:** The three-day event brought over 150 SDS2 users and employees to St. Pete Beach, Florida, to learn from each other, talk shop, and build connections.

The opening day included an engaging keynote address by the nearby Clearwater Marine Aquarium on the human impacts to marine wildlife and how we can help mitigate environmental harm.

SDS2 and ALLPLAN also took the stage to discuss product development plans for each company, as well as to address details on the recently announced merger.

Michelle McCarthy, who has been with SDS2 for over 15 years and was recently announced as the ALLPLAN regional manager for the Americas, assured the crowd that while many details are still being decided upon, SDS2's mission to deliver reliable and innovative steel detailing software will not change.

“What this means is that you will not likely see immediate changes to SDS2 as a software,” McCarthy said. “Right now, we are evaluating resources and technology to see if and how we can leverage those for your benefit.”

She also emphasized the value of collaboration between our users and development team—a key tenet not only of SDS2 Summit, but also of SDS2's daily operations and long-term development plans.

“SDS2 Summit provides a great opportunity for my company to stay updated with the latest technologies and innovations available today. It gives us a chance to meet others in our field of work and learn about how their companies utilize SDS2 during their day-to-day operations. There hasn't been a year that I've attended and not returned with something helpful for our company.”

**- Marvin Freeman, Williams Steel Company**

Throughout the conference we hosted over 30 sessions focused on detailing and fabrication efficiencies, with prominent guest speakers across the SDS2 user base and structural steel industry contributing their expertise and insights.

Roundtable discussions gave users and employees a chance to talk it out and share ideas for improvement and development in a variety of areas. They discussed SDS2 staples, including modeling, drawing editor, connection design, and our UI/UX, as well as more granular topics: interoperability with SDS2 partners, CNC, help documentation, and the SDS2 + Bluebeam workflow, among others.

And let's not forget the fun. We were at the No. 1 beach in America, after all, and the scenery did not disappoint. Thursday night's dinner reception took place on the beach and capped off with a celebration of this year's [Solid Steel](#)

## [Award winners.](#)

It was, as Stephanie Haith, SDS2 director of product development at SDS2 said, the perfect recipe for innovation and knowledge sharing. “There’s no better event for bringing together people who use, know, and support SDS2 and to build a rapport between the people behind the product and those in front of it.”

### **About the Nemetschek Group**

The Nemetschek Group is a pioneer for digital transformation in the AEC/O industry. With its intelligent software solutions, it covers the entire lifecycle of building and infrastructure projects and guides its customers into the future of digitalization. As one of the leading corporate groups worldwide in this sector, the Nemetschek Group increases quality in the building process and improves the digital workflow of all those involved in the building process. Customers can design, build and manage buildings more efficiently, sustainably and resource-saving. The focus is on the use of open standards (OPEN BIM). The portfolio also includes digital solutions for visualization, 3D modeling, and animation. The innovative products of the 15 brands of the Nemetschek Group in the four customer-oriented segments are used by approximately six million users worldwide. Founded by Prof. Georg Nemetschek in 1963, the Nemetschek Group today employs more than 3,000 experts.

Publicly listed since 1999 and quoted on the MDAX and TecDAX, the company achieved revenue amounting to EUR 596.9 million and an EBITDA of EUR 172.3 million in 2020.
