Shaping the Future Together: The Nemetschek Group Presents its Solutions at ReBuild Ukraine

Munich, November 8, 2023 – From November 14 to 15, the [Nemetschek Group](#) will be taking part in ReBuild Ukraine in Warsaw. The international event is specifically dedicated to the reconstruction of war-torn Ukraine. The Nemetschek Group will be represented in Poland with five brands and will present software solutions that can contribute to the efficient reconstruction of buildings and infrastructure such as tunnels and bridges.

The focus of the trade fair and conference, which will take place for the second time in 2023, is on infrastructure, industry, energy, and residential

construction. Everything revolves around the necessary materials, technologies, equipment, and investments. The main objective of ReBuild Ukraine is to create a platform for international institutions to aid in the reconstruction of Ukrainian cities and communities as well as to support Ukrainian energy companies in the restoration of critical infrastructure facilities.

As an international software provider, the Nemetschek Group, together with its brands Allplan, Bluebeam, Graphisoft and Solibri and the horizontal, data-driven digital twin platform dTwin, will be showcasing at ReBuild Ukraine how digital solutions can support a rapid reconstruction. The solutions are used in infrastructure projects such as tunnels and bridges, in building construction and civil engineering as well as in construction with precast concrete elements. In addition, there are solutions for quality management and control, collaboration, as-built digitalization, and data management, which provide the basis for efficient, resource-saving operation of new buildings and infrastructure. Fast, smooth processes and barrier-free collaboration between all project participants have characterized Nemetschek solutions along the entire building value chain for more than half a century.

Yves Padrines, CEO of the Nemetschek Group: "We are all moved by the difficult situation of the people in Ukraine. As an international company with European roots, we are aware of the responsibility we have now and in the future. That is why we are committed to working with our brands in the coming years to rebuild the country sustainably and efficiently."

ReBuild Ukraine will take place on the grounds of EXPO XXI in Warsaw, Poland. The Nemetschek Group and its brands can be found at a joint stand in Hall 1-A-7, next to the European Commission.

About the Nemetschek Group

The Nemetschek Group is a globally leading software provider for digital transformation in the AEC/O and media industries. Its intelligent software solutions cover the entire lifecycle of building and infrastructure projects and enable creatives to optimize their workflows. Customers can design, build, and manage buildings and infrastructures more efficiently and sustainably and develop digital content such as visualizations, films and computer games

more creatively. The software provider is driving innovations such as digital twins as well as open standards (OPEN BIM), and sustainability in the AEC/O industry, constantly expanding its portfolio by also investing in deep-tech startups. Currently more than seven million users worldwide are shaping the world with the customer-focused solutions of our four divisions. Founded by Prof. Georg Nemetschek in 1963, the Nemetschek Group today employs around 3,600 experts globally.

Publicly listed since 1999 and quoted on the MDAX and TecDAX, the company generated revenues amounting to EUR 801.8 million and an EBITDA of EUR 257.0 million in 2022.
