

SOLIBRI

AUTODESK BIM 360

A WHOLE NEW
WORLD OF
POSSIBILITIES

This release launches the integration with BIM 360, allowing Solibri and Autodesk users to collaborate efficiently to drive BIM quality in their projects

Dec 22, 2022 09:25 UTC

Solibri and Autodesk BIM 360 open the world of possibilities for a seamless workflow

Helsinki, December 22, 2022 - From today, Autodesk users can benefit from the seamless integration with Solibri Office, the most advanced BIM quality assurance software for the construction industry.

Solibri's direct integration with Autodesk BIM 360 enables users to create an efficient and reliable workflow to validate the quality of their BIM models, and easily share changes, issues or resources with relevant stakeholders.

Users will be able to open IFC files that are stored in BIM 360 directly from within Solibri, without the need to download and maintain multiple local files. Collaboration is an integral part of our customers' work. And with hundreds of multi-disciplinary BIM models created for each project, being able to manage all resources from one source of truth is critical for successful execution.

“The BIM 360/ACC connector from Solibri makes it easy for Skanska Norway to have one central storage area for BIM files. It will help us to save time and be more efficient in our cooperation around BIM models with all parties in our projects.” – Øivind Pettersen, Project Manager, Digital construction site Skanska Norway.

Solibri's mission is to raise the quality of BIM standards within the industry. The integration with Autodesk BIM 360 shows Solibri's commitment to BIM quality regardless of the authoring software.

Learn how to connect Solibri and Autodesk BIM 360 to supercharge your BIM quality workflow.

Other improvements

In this version, we have added the option to open and save Documents API files directly from the Open/save file dialog, as well as some minor performance and usability improvements. You can see the full content of the release in the [Release Notes](#).

To get the new version, use the [auto-update feature](#) or contact your Solibri Administrator. Please note that to get this new version, in addition to comprehensive customer support and all future software releases, you need to have a valid Support & Service Agreement or Subscription.☒

About the Nemetschek Group

The Nemetschek Group is a pioneer for digital transformation in the AEC/O and the media & entertainment industries. With its intelligent software solutions, it covers the entire lifecycle of building and infrastructure projects, guides its customers into the future of digitalization and enables them to

shape the world. As one of the leading corporate groups worldwide in this sector, the Nemetschek Group increases quality in the building process and improves the digital workflow for all those involved. Customers can design, build, and manage buildings more efficiently, sustainably and resource-saving. The focus is on the use of open standards (OPEN BIM). The portfolio also includes digital solutions for visualization, 3D modeling, and animation. The innovative solutions of the brands ALLPLAN, Bluebeam, Crem Solutions, dRofus, FRILO, Graphisoft, Maxon, Nevaris, RISA, SCIA, Solibri, Spacewell and Vectorworks in the four customer-oriented segments are used by approximately 6.5 million users worldwide. Founded by Prof. Georg Nemetschek in 1963, the Nemetschek Group today employs around 3,400 experts all over the world.

Publicly listed since 1999 and quoted on the MDAX and TecDAX, the company achieved revenue amounting to EUR 681.5 million and an EBITDA of EUR 222.0 million in 2021.
