Solibri Connection for ARCHICAD 23 Released

Add-on delivers faster, automated code and constructability checking optimized for higher design quality for ARCHICAD users

Budapest, December 18, 2019 - GRAPHISOFT®, the global leader in Building Information Modeling (BIM) software solutions for architects, has announced the release of the latest version of the widely adopted Solibri Connection add-on for ARCHICAD 23. The add-on allows faster BIM updates and the use of Solibri Office, Site or Anywhere while working in a real-time design scenario.

The Solibri Connection add-on provides fast and automated code and constructability checking. Optimized for ARCHICAD 23, the updated add-on automatically processes only those elements that are changed in the ARCHICAD model, resulting in faster collaboration. BCF-based issue reporting was introduced to this workflow, enabling designers to assign the detected issues to teammates. This add-on allows faster BIM updates and the use of Solibri while working in a real-time design scenario. Unlike with other software, Solibri Connection users no longer need to save files to improve or evaluate the quality of their BIM model.

“This is another step in our journey to offer more real-time data that ensures better model quality and greater connectivity within the Nemetschek Group. I am pleased to see our collaboration with GRAPHISOFT continue to grow, and I look forward to delivering even greater interoperability for our users,” said Ville Kyytsönen, Solibri CEO.

“As members of the Nemetschek family, Solibri and GRAPHISOFT can leverage their expertise to offer customers the very latest benefits in interoperability. Access to Solibri’s unique rule-based Quality Control technology in such a smooth and integrated way will help our customers deliver better designs in a shorter amount of time,” said Peter Temesvári, Director, Product Management at GRAPHISOFT.

[The Solibri Connection add-on supports ARCHICAD 23. For more information, please visit the ARCHICAD add-ons page.](#)

About Solibri

[Solibri](#) envisions a Digital Future of Better Builds by developing market leading quality assurance solutions to improve the quality of BIM-based designs and make the entire digital construction process more productive and cost effective. Solibri’s customers include major building owners, construction companies, architects and engineering firms in more than 70 countries. Solibri is part of the Nemetschek Group.

About GRAPHISOFT

[GRAPHISOFT®](#) ignited the [BIM](#) revolution in 1984 with [ARCHICAD®](#), the industry-first BIM software for architecture. GRAPHISOFT continues to lead the industry with innovative solutions such as its revolutionary [BIMcloud®](#), the world's first real-time BIM collaboration environment; and [BIMx®](#), the world's leading mobile app for lightweight access to BIM for non-professionals. GRAPHISOFT is part of the Nemetschek Group.
