## Solibri signs Commercial Agreement with Norwegian BIM Startup Imerso

The world's leading provider of construction model coordination and quality control software, Solibri is expanding the applications of BIM in construction by partnering with Imerso to ensure continuous fieldwork compliance throughout the production phase.

**Helsinki/Oslo, November 14, 2022** - Solibri, the leading provider of BIM Quality Assurance and Quality Control and part of the Nemetschek Group, today announced a commercial partnership of Solibri with the Norwegian tech startup Imerso.

The partnership leverages quality BIM models created by Solibri customers on-site in the construction phase through Imeroso's easy 3D Scanning and automated quality control monitoring software. Imeroso is unique in how the solution enables customers to go to the next step with BIM by taking the model-based construction process to the actual site - checking that construction follows the design.

The companies have joined forces to improve the workflow between BIM and site this year, so that all data from Imeroso's inspection platform can now be easily imported for analysis in Solibri, including:

- IFC files embedded with the current as-built status as properties, allow Solibri users to run custom rulesets and quantity takeoffs based on the real field conditions at the site.
- BCF files of detected deviations between the onsite fieldwork and the specification of the building plans. These include the details of each reported case for easy follow-up with the responsible teams, with augmented reality screenshots, onsite location, and unique IFC ID of all objects and teams affected.
- Automatic updating BIM to the as-built status at the press of a button, leveraging Imeroso's automated tools to eliminate countless hours of manual modeling work to keep BIM files relevant throughout the construction phase, and meet increasing Owner's requirements for accurate BIM deliverables.

"The more customers invest into BIM, the more sense it makes to have efficient ways of tracking the built reality closely against those plans and keeping BIM relevant to project completion," says Frederico Valente, Imeroso founder, and CEO. "We are extremely excited to join forces with Solibri on our mission to drive productivity in the construction industry, and believe the combination of our products will create a fundamental change in the way BIM is used across the entire building lifecycle."

"Taking BIM to site is one of the everlasting conversations where we have previously thought of model access, iPads, etc as solutions. Now we approach it differently by actually having a model-based workflow to ensure construction is done according to the design. People on-site don't necessarily need to have access to the model, as long as they have the necessary knowledge of the project. With Imeroso we can ensure that work is performed correctly, saving time, materials, and environment." says Ville Kyytsönen, CEO

Solibri.

The announcement comes on the heels of an investment in Imerso led by the Nemetschek Group earlier in January. Both companies will be presenting their products' integrated workflows to visitors at this year's edition of BIM World Munich November 22 and 23 in Germany.

### **About Solibri**

Solibri is the leader in BIM Quality Assurance and Quality Control. Providing out-of-the-box tools for BIM validation, compliance control, design process coordination, design review, analysis, and code checking. Solibri's corporate message is to develop and market quality assurance solutions that improve the quality of BIM-based design and make the entire design and construction process more productive and cost-effective. Solibri's customers include major building owners, construction companies, architects and engineering firms in more than 70 countries. Solibri is part of the Nemetschek Group.

### **About the Nemetschek Group**

The Nemetschek Group is a pioneer for digital transformation in the AEC/O and the media & entertainment industries. With its intelligent software solutions, it covers the entire lifecycle of building and infrastructure projects, guides its customers into the future of digitalization and enables them to shape the world. As one of the leading corporate groups worldwide in this sector, the Nemetschek Group increases quality in the building process and improves the digital workflow for all those involved. Customers can design, build, and manage buildings more efficiently, sustainably and resource-saving. The focus is on the use of open standards (OPEN BIM). The portfolio also includes digital solutions for visualization, 3D modeling, and animation. The innovative solutions of the brands ALLPLAN, Bluebeam, Crem Solutions, dRofus, FRILO, Graphisoft, Maxon, Nevaris, RISA, SCIA, Solibri, Spacewell and Vectorworks in the four customer-oriented segments are used by approximately 6.5 million users worldwide. Founded by Prof. Georg Nemetschek in 1963, the Nemetschek Group today employs around 3,400 experts all over the world.

Publicly listed since 1999 and quoted on the MDAX and TecDAX, the company achieved revenue amounting to EUR 681.5 million and an EBITDA of EUR 222.0 million in 2021.
