Spacewell Boosts Its MCS IWMS Offering

Antwerp, November 24, 2021 – Spacewell today released version 21 of its BIM-enabled MCS IWMS software. MCS 21 primarily brings improvements in the areas of space management, workplace reservations, maintenance, and business intelligence, with a range of new dashboards.

These dashboards are dynamic, meaning every piece of a chart or visualization is clickable. Drill-down functionality transforms the total dashboard into an analytics tool. It all happens in real-time, powered by the data of the user. MCS 21 also provides the ability to use on-demand custom queries to meet specific business needs. In addition, Spacewell added a 'Bring your own BI' option enabling users to connect to the corporate analytics

package of their choice. Furthermore, MCS 21 also offers the possibility to exchange asset data with O-Prognose specialized long-term maintenance planning & budgeting software.

MCS is a modular IWMS that meticulously integrates a range of different solutions and mobile applications. Every solution corresponds to a certain domain and can be used independently or combined with other solutions. MCS is recognized for its best-in-class mobile apps, embedded Building Information Modeling (BIM), and native integration with Spacewell's smart workplace IoT platform. The latest [Verdantix](#) Green Quadrant IWMS benchmark report specifically mentioned Spacewell MCS strengths in:

- Platform integration across all core IWMS applications
- Highly intuitive functionality across workplace and service management
- IoT-enabled solutions

With this year's MCS update, Spacewell continues to raise the bar for Integrated Workplace Management Solutions. Read [more details about the new release](#) or [watch a short video](#)

About the Nemetschek Group

The Nemetschek Group is a globally leading software provider for digital transformation in the AEC/O and media industries. Its intelligent software solutions cover the entire lifecycle of building and infrastructure projects and enable creatives to optimize their workflows. Customers can design, build, and manage buildings and infrastructures more efficiently and sustainably and develop digital content such as visualizations, films and computer games more creatively. The software provider is driving innovations such as digital twins as well as open standards (OPEN BIM), and sustainability in the AEC/O industry, constantly expanding its portfolio by also investing in deep-tech startups. Currently more than seven million users worldwide are shaping the world with the customer-focused solutions of our four divisions. Founded by Prof. Georg Nemetschek in 1963, the Nemetschek Group today employs around 3,600 experts globally.

Publicly listed since 1999 and quoted on the MDAX and TecDAX, the company generated revenues amounting to EUR 801.8 million and an EBITDA of EUR 257.0 million in 2022.
