2022 Leader in both IWMS and IoT platforms for Smart Buildings

Mar 21, 2022 19:00 UTC

Spacewell Recognized as a Leader in the IWMS Market

Antwerp, March 21, 2022 – The third edition of the [Verdantix Green Quadrant IWMS solution benchmark](#) study, recently released after a five-month intensive research process, once again names Spacewell a Leader in IWMS (Integrated Workplace Management Systems).

One of the key trends that Verdantix highlights in the report is that “mobile applications, IoT solutions and advanced analytics will continue to drive long-term IWMS innovation.”

This is an evolution that Spacewell anticipated very early on, by co-developing and natively integrating its IWMS with a powerful IoT platform for smart buildings.

As a result, Spacewell is now one of the select vendors that is a Leader in both IWMS [and Smart Building solutions](#). By integrating the two software platforms it makes the IWMS function smarter and lets the Smart Buildings solution drive greater behavioral changes and other performance improvements.

With its integrated solution, Spacewell provides real-time access to high-quality data and empowers building occupants, managers and service providers to make insights actionable across user types and activities. Through this, the software helps organizations adapt flexibly to the post-pandemic world of work and remain resilient to change.

About the Nemetschek Group

The Nemetschek Group is a pioneer for digital transformation in the AEC/O and the media & entertainment industries. With its intelligent software solutions, it covers the entire lifecycle of building and infrastructure projects, guides its customers into the future of digitalization and enables them to shape the world. As one of the leading corporate groups worldwide in this sector, the Nemetschek Group increases quality in the building process and improves the digital workflow for all those involved. Customers can design, build, and manage buildings more efficiently, sustainably and resource-saving. The focus is on the use of open standards (OPEN BIM). The portfolio also includes digital solutions for visualization, 3D modeling, and animation. The innovative products of the 13 brands of the Nemetschek Group in the four customer-oriented segments are used by approximately 6.5 million users worldwide. Founded by Prof. Georg Nemetschek in 1963, the Nemetschek Group today employs around 3,400 experts all over the world.

Publicly listed since 1999 and quoted on the MDAX and TecDAX, the company achieved revenue amounting to EUR 681.5 million and an EBITDA of EUR 222.0 million in 2021.
