Vectorworks Launches Creative Genius Awards to Celebrate Bold, Boundary-Pushing Designers

Columbia, MD (October 28, 2025)— Global design and BIM software provider [Vectorworks, Inc.](#), part of the [Nemetschek Group](#), proudly announces the Vectorworks [Creative Genius Awards](#), a new global competition recognizing designers who dare to break the mold and think differently. The program invites creative professionals in architecture, interior, landscape, and entertainment design to submit their most daring and inventive projects — completed or in progress — that solve problems in unexpected ways and inspire fresh perspectives, for a chance to win a prize package featuring cash,

innovative tech, and more.

“Every bold idea starts with someone willing to think beyond limits,” says Vectorworks Vice President of Customer Engagement John D’Addario. “With the Vectorworks Creative Genius Awards, we’re celebrating the innovators who reimagine what’s possible, challenge conventions, and inspire a global community of designers with their creativity. We’re excited to see the remarkable entries and the ways our customers’ ideas will continue to shape the future of design.”

One grand prize winner in each of the four categories: [Architecture](#), [Interior Design](#), [Landscape Design](#), and [Entertainment Design](#), will receive \$5,000 USD, exclusive Vectorworks swag, a tech bundle, and more. A panel of judges, comprised of Vectorworks executives, industry experts, and creative professionals, will evaluate submissions based on several criteria, including design quality, the use of Vectorworks features, originality and innovation, presentation, and sustainability. Additionally, there will be specific criteria for each category that evaluate key aspects of bold design:

- **Architecture:** Focus on adaptive reuse, contextual integration, and BIM workflows.
- **Interior Design:** Emphasis on experiential quality, spatial innovation, and material usage.
- **Landscape Design:** Consideration of ecological strategies, planting design, and site integration.
- **Entertainment Design:** Emphasis on immersive experiences, technical complexity, and innovative use of Vectorworks Spotlight, and/or [Braceworks](#), [ConnectCAD](#), or the [Showcase](#) feature in Vectorworks Spotlight.

Designers are encouraged to share their genius by January 31 to claim their spot among the global creative minds who refuse to color inside the lines. Winners will be announced during the Vectorworks Open House event in 2026. To be considered for an award, all designs and creative concepts must be created in Vectorworks. For more information and to enter, visit vectorworks.net/creative-genius-awards.

The Nemetschek Group is a globally leading software provider for the digital transformation in the AEC/O and media industries. Its intelligent software solutions cover the entire lifecycle of construction and infrastructure projects and allow creatives to optimize their workflows. Customers can plan, construct, and manage construction projects more efficiently and sustainably, and develop digital content such as visualizations, films, and computer games in a creative way. The software company drives new technologies such as artificial intelligence, digital twins, and open standards (OPEN BIM) in the AEC/O industries to increase productivity and sustainability and continuously expands its portfolio, including through acquisitions and investments in innovative start-ups. More than 7 million users are currently using the customer-focused solutions. Founded by Prof. Georg Nemetschek in 1963, the Nemetschek Group today employs more around 4,000 experts.

The company, which has been listed in the MDAX and TecDAX since 1999, achieved a revenue of EUR 995.6 million and an EBITDA of EUR 301.0 million in 2024. Since the end of 2024, the Nemetschek Group is certified in accordance with ISO 27001, the internationally recognized standard for information security management systems (ISMS).
