

Update adds new mesh deforming capabilities, Spotlight enhancements and more.

Jul 20, 2023 19:00 UTC

## ZBrush 2023.2 now available

**Bad Homburg - July 20 2023** - Hot on the heels of yesterday's update to Redshift, Trapcode and Forger, Maxon is pleased to announce the immediate availability of an updated version of ZBrush. ZBrush 2023.2 includes a new tool as well as valuable updates to existing ones:

- **Anchors Brush:** provides an intuitive new way to deform meshes. It works by applying anchors onto a mesh while allowing for a variety of actions to be performed with or without symmetry. Some actions include Inflate, Twist, Move and Rotate.
- **Spotlight Enhancements:** The Spotlight feature receives updated sliders providing increased control over the impact of alphas on

surfaces. Mid-Value and Blur sliders join the already robust feature set. Spotlight provides artists with the ability to load, manipulate and transfer color and sculptural detail to the surfaces of ZBrush models.

- **Morph Brush Enhancement:** The Morph Brush is expanded to include compatibility with Undo History. The Morph Brush allows use of any instance of the Undo History as a morph target.
- **Contact** has been updated to allow for intuitive alignment of one mesh to another.
